DETAILED ACTION

Specification

1. The titles of the abstract and the entire disclosure are objected to because the title of the Invention is not properly descriptive. The invention as claimed is drawn to only an apparatus. A new title is required that is clearly indicative of the invention to which the claims are directed. Furthermore, in the Preliminary Amendment A filed on 10.30.00, the Applicant should update the data to include the Patent Nos. Of 08/673,674 as 6,179,788 and also for 07/452,710 as 5,209,730. Correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejection's under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

3. Claims 11-12, 15-20, 23, 24 and 27 - 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Gambale et al.

Gambale et al. discloses a guidewire for intravascular use (Col. 1, Ins. 5-9) having an elongate solid shaft (10, having cross-hatching to indicate its solid nature at Figs. 1 and 2) with a proximal end (near element 10) and distal end (near element 22) with a taper towards its distal

end (12 Col. 2, Ins. 53-57), a radiopaque tip (18, Col. 3, Ins. 19-20) and a plurality of radiopaque markers defined by the individual coils of coil (24) that have longitudinal spaces therebetween, they are longitudinally spaced with respect to each other and spaced with the nonradiopaque coil (30) (Fig. 1 at area 12).

Allowable Subject Matter

4. Claims 13, 14, 21, 22, 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: Prior art of record did not suggest or disclose an intravascular guidewire having markers with a plurality of longitudinal spaces therebetween that are 1.5cm, or such a device with markers that are 1mm wide..

Conclusion

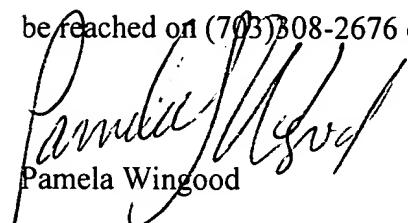

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Gambale (4,763,647) discloses a guidewire having a solid tapered shaft and having distal coils that are more radiopaque than the proximal coils.
